SMK

Safety. Quality. Customer Service.

Who We Are

Industrial equipment services and fabrication from line design to end items

Headquartered in eastern Washington State since 1991, we are a national leader in industrial equipment design, fabrication, installation, and maintenance

We design and fabricate industrial lines for any market sector and produce custom components from the design phase to delivery

- 1 Customer Centric**
Customers are at the center of everything we do – we stand behind our work and guarantee customer satisfaction
- 2 Comprehensive Services**
Our craftsmen have the wide-ranging expertise to manage the entire lifecycle of your project, from design to installation and maintenance
- 3 Manufacturing Leader**
We manufacture the highest quality end items made of any industrial material
- 4 Integration Experts**
Our fabricated integration systems bring machine components together and we leverage strategic partnerships to provide universal services
- 5 Partners with Integrity**
Honest and truthful in what we say and do, we prioritize integrity above all else

Precision Cutting Technologies (PCT)

PCT's advanced machining and fabrication expertise ensures top quality parts and excellent service

From single item orders to a production run of several thousand, PCT is a complete manufacturing solution for parts of any construction material

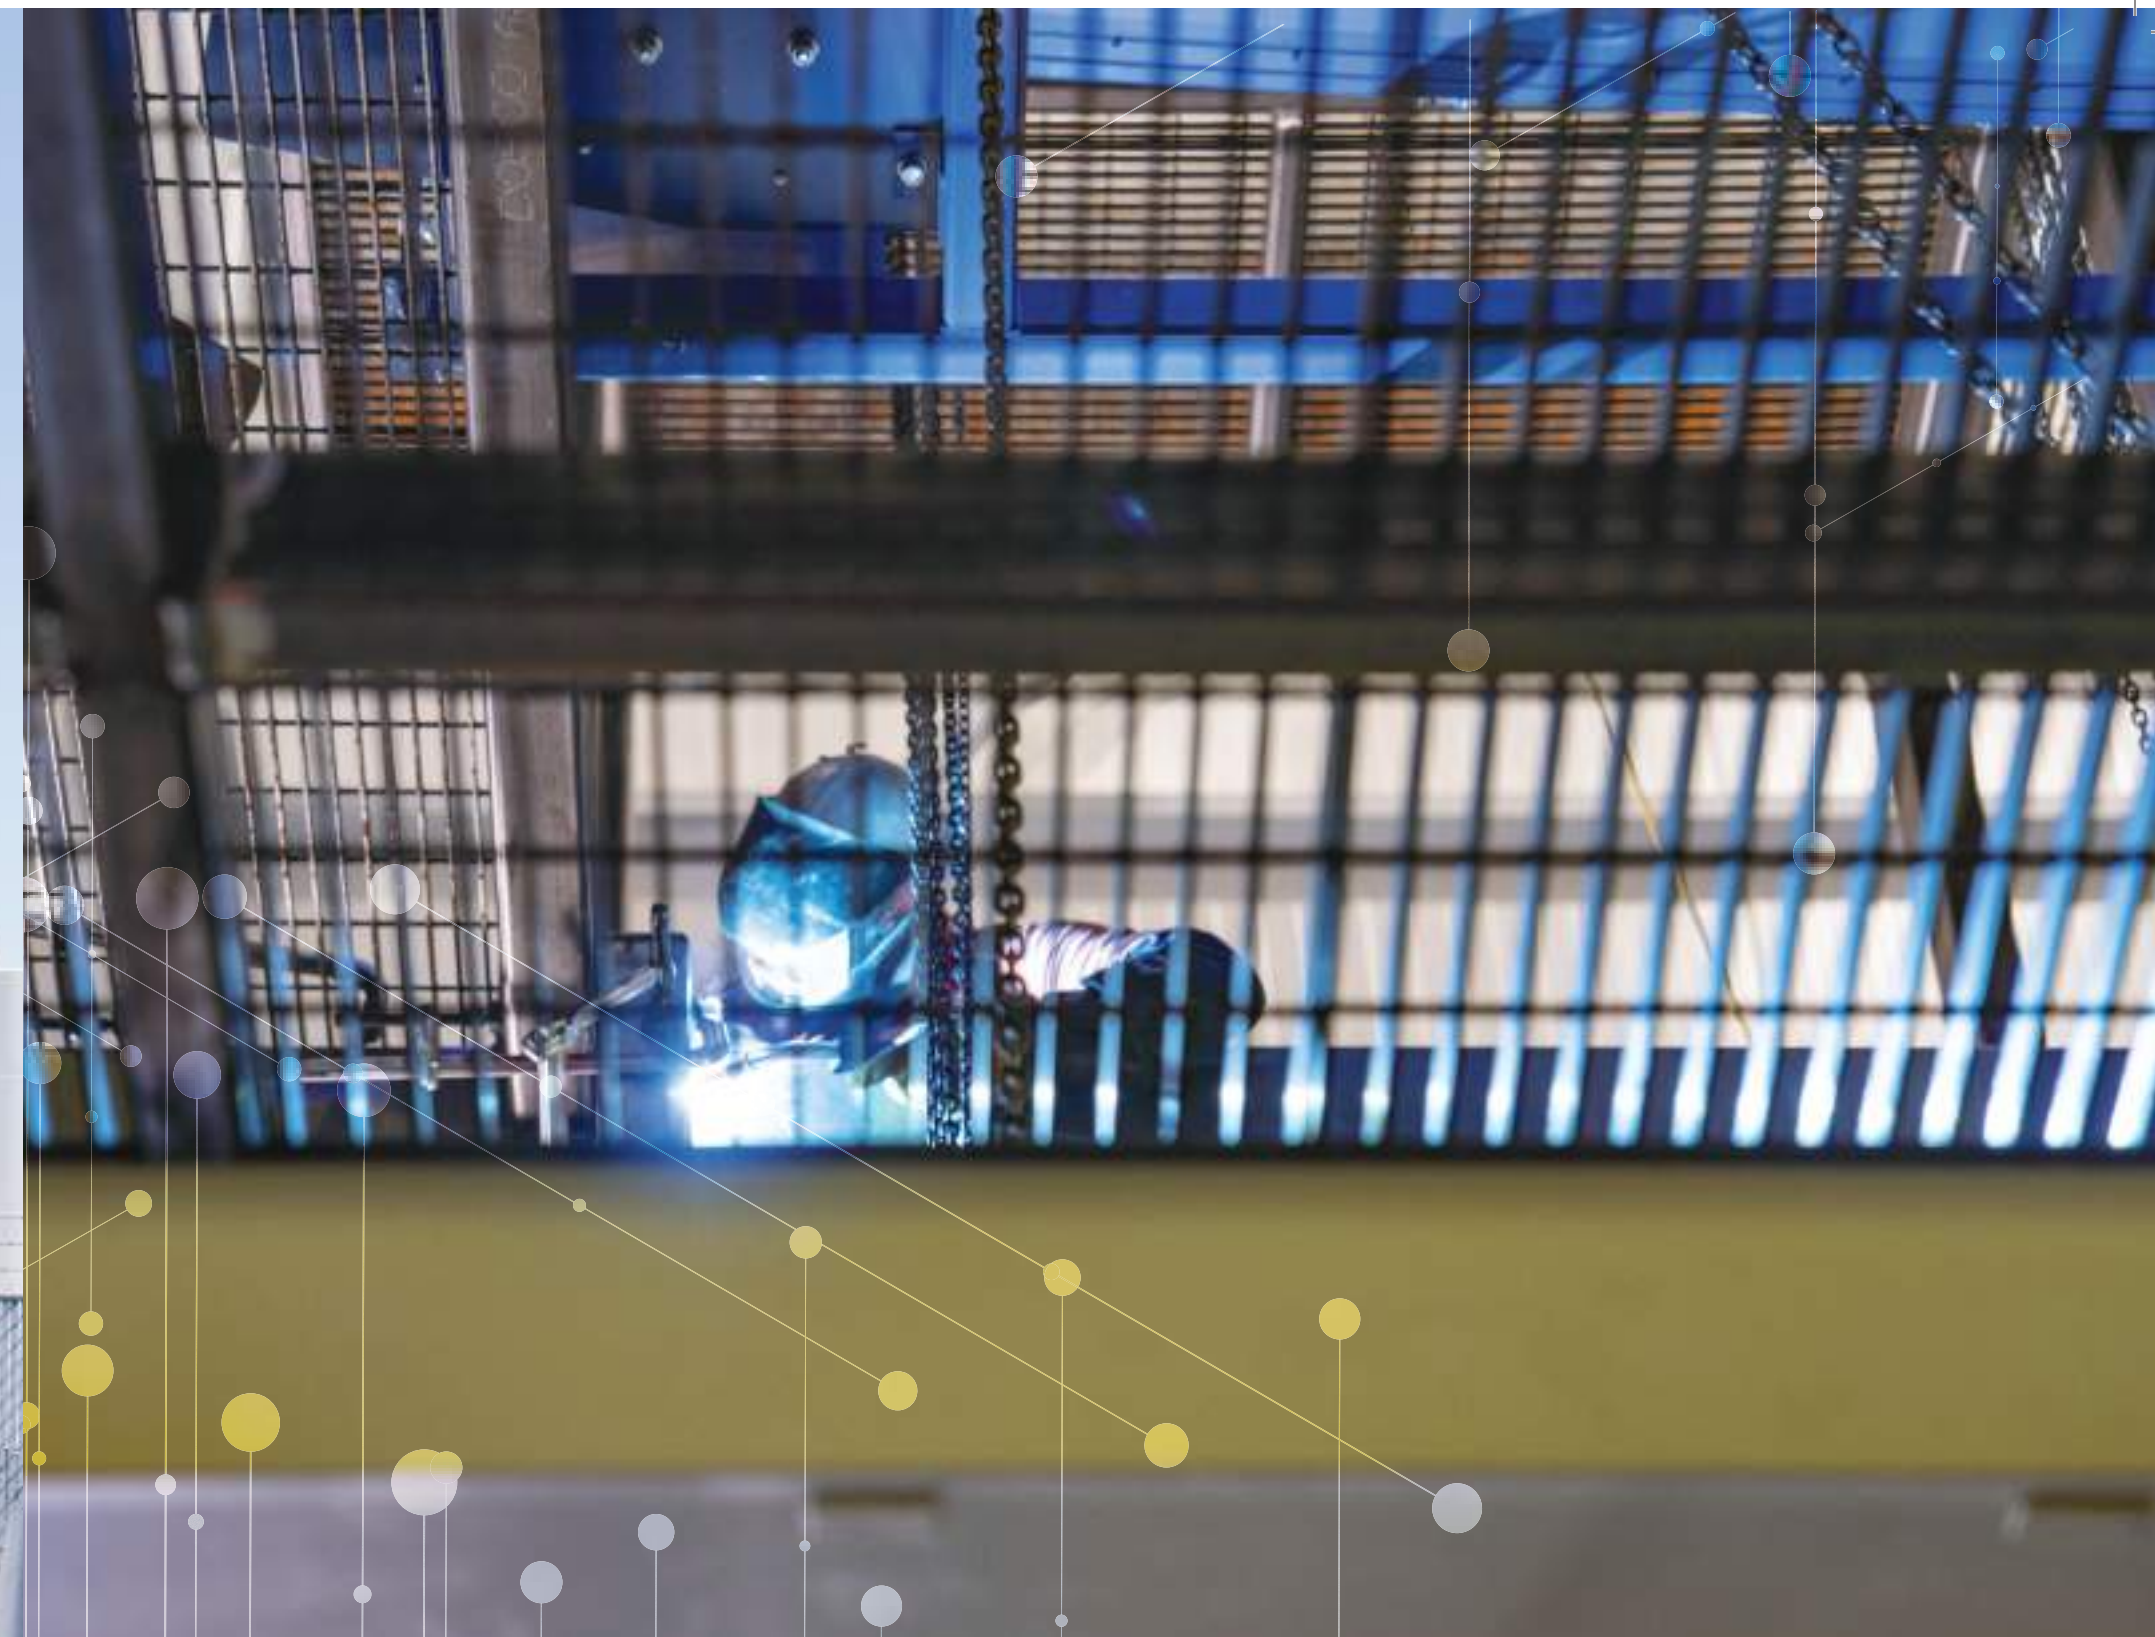

Our Trusted Partners

Precision Industrial Equipment (PIE)

PIE is an industrial equipment design, fabrication, and integration company. With superior engineering services and ability to integrate multiple pieces of technology into one line, PIE provides universal services from design to delivery

PIE's industrial lines can receive and palletize any product for a ready-to-ship solution

Our Services

MACHINE CUTTING

Our advanced machine tools provide complex cutting of virtually any material with an accuracy within $\pm .003''$

FIELD INSTALLATION

Industrial processing from equipment setting, transitions and chutes, conveyors, catwalk and stairs, air handling systems, piping, and tanks

METAL FABRICATION

Accurate and efficient production of light gauge sheet metal objects for commercial and industrial uses

INDUSTRIAL DESIGN

Leveraging a fully equipped fabrication shop capable of shearing, roll forming, break forming, MIG & TIG welding, drilling, and punching

PRODUCTION LINE

Expert fabrication and installation of custom receiving lines and sanitary piping systems for any industrial setting

DESIGN AND DRAFTING

Our skilled mechanical engineers employ CAD technology to design end items and CNC machined parts, providing custom solutions to our customers

CUSTOM METAL DESIGN

Manufacturing any type of custom end item and design products for custom fabrication

PLANT MAINTENANCE

Production line additions, machine guarding, metal tool and equipment maintenance, emergency duplication and replacement, and complete turnkey capital projects

PROJECT MANAGEMENT

Providing project management for large capital projects and our services with our skilled leadership, foremen, and estimators

Our Projects

Large Produce Receiving Line

Sanitary Piping System

Potato Processing & Packaging Line

Pellet Processing System

Hop Pelletizing System

Our Employees

100+

Field Operators

Our expert field craftsmen have the operational agility to manage any project

15

Shop Fabricators

We produce best-in-class light gauge sheet metal components for commercial and industrial uses

3

Draftsmen

Our mechanical engineers employ the latest CAD technology to design end items and CNC machined parts from concept to delivery

5

Estimators

We have 50 years of estimating experience to forecast on-time and under-budget projects
